MSR Cambridge, England

MSR Asia

Silicon Valley, California

Microsoft Research Mission Statement

- Expand the state of the art in each of the areas in which we do research
- Rapidly transfer innovative technologies into Microsoft products
- Ensure that Microsoft products have a future

Value of Microsoft Research to Microsoft

Microsoft
Research

- **Source of IP and new product technologies**
 - Microsoft Research generates roughly 20% of the Company's patents and generally Microsoft Research patents are more "fundamental"
- **Problem solving**
 - Ability to bring smart people to bear rapidly on hard problems confronting products, product groups or the company
- **Early warning system**
 - Ears to the ground in new areas across a broad range of technologies

Microsoft Research Patent Award

Basic Research → Agility

- Basic research group allows a company like Microsoft to respond more rapidly to change
- Research provides a reservoir of technology, expertise and people that can be quickly brought to bear:
 - New technologies
 - New competitors
 - New business models

You invest in basic research and long-term research precisely because you don't know what the future will hold. You don't know whether there will be a war, a disease outbreak, a famine, a new competitor, or an economic dislocation of some kind.

Vannevar Bush

Describing what would eventually become the National Science Foundation and the U.S. federal research infrastructure

Inventing the Future

- Interactive Visual Media
 - Graphics and Multimedia
 - Digital Photography and Video
- Platform Elements
 - Networking, Distributed systems, Operating systems
 - Cellphone and other Devices
 - Sensor networks
 - Security, Protection against Malware
- Reinventing Software Development
 - Languages, tools, compilers
- Data and Documents
 - Data Solutions for a Terabyte World
 - Search
 - Fighting SPAM
- UI and Collaboration
 - New UI – Speech, Ink, Gesture, Natural Language
 - Meetings and Collaboration
 - Modeling of People and Groups
- Science
 - AIDS Vaccine, Quantum Computing, Astronomy
 - Algorithms, Cryptography

Working with the Worldwide Academic Community

- Participate in Research Community
 - Extensive publication and conference participation
 - Professional service – DARPA, NSF, NRC
- Strong ties with universities
 - Joint research projects
- Extensive visitor and speaker program
 - Students, faculty, research scientists
 - Post-docs, sabbatical
 - Largest PhD internship program in the Industry

Worldwide Talent Support

80

students from around the world selected in 2008 for Ph.D. fellowships and scholarships

MORE THAN **100** top Ph.D. research students from leading European academic institutions currently supported by Microsoft Research fellowships

10

computer science students selected each year under the GRADUATE WOMEN'S SCHOLARSHIP PROGRAM

ABOUT **400**

TOP STUDENTS

from dozens of universities participate each year in Microsoft Research Asia's Stars of Tomorrow internship program

25

Microsoft Research Faculty Fellowships awarded since 2005 in the U.S. and Canada

MORE THAN **25,000**

scientists, academic researchers, faculty and students have attended Microsoft Research-sponsored summits, conferences and workshops since 2005

Microsoft Research collaborates with more than

100

top universities in North America

NEARLY

1,000

students selected annually for internships at Microsoft Research labs in the U.S., China, India and the UK

ABOUT **100**

students and young faculty attend the annual MICROSOFT RESEARCH INDIA SUMMER SCHOOL PROGRAM

250

RESEARCHERS FROM

50

UNIVERSITIES IN

16

COUNTRIES

have joined with Microsoft Research in the Latin American and Caribbean Collaborative ICT Research Federation (LACCIR)

1,500

attendees at Microsoft Research India's TechVista 2008 research symposium in Chennai

465

students from more than

35 countries

have interned at the Microsoft Research Cambridge (UK) lab during the past seven years

3,000

students, faculty and research scientists attended Microsoft Research Asia's Computing in the 21st Century conferences in Beijing and Singapore

MORE THAN **30**

collaborative institutes and technology learning labs supported worldwide in research areas such as parallel computing, games for learning, artificial intelligence, computational and systems biology, and computational thinking

250

Ph.D. fellowships granted to students from 50 universities in the Asia-Pacific region since 1998

announcing

Extending a collaborative relationship with:

National Center for Women &
Information Technology (NCWIT)

NCWIT and Microsoft

- NCWIT is a national coalition of over 170 prominent corporations, academic institutions, government agencies, and nonprofits
- Working to achieve and maintain U.S. global competitiveness in information technology through the encouragement and recruitment of women
- Efforts to increase women's participation in IT along the entire pipeline, from K-12 and higher education through industry, academic, and entrepreneurial careers
- www.ncwit.org
- Second partnership with NCWIT
- Microsoft and NCWIT are collaborating to raise awareness of today's changing workforce and the positive impact that women in IT have on the industry
- Microsoft provides \$1M support over four years
- Continues relationship previously announced in 2006
- Underscores Microsoft's continued commitment to addressing critical shortages of women in the computer science talent pipeline

Five Years of Faculty Fellowships: A Retrospective

"Microsoft Research Faculty Fellowships" 2010

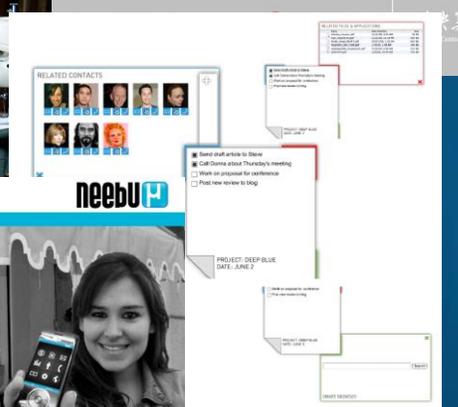

- New name: Microsoft Research Faculty Fellowships
 - Broadening the program beyond North America
 - Europe, Middle East, Africa (EMEA)
 - Latin America (LATAM)
- 2010 Fellowship Selection Process
 - Sep–Oct 2009: each institution submits *one nominee*
 - Applications vetted through 3 rounds of reviews
 - Winners announced in April 2010
 - Program information is at:
<http://research.microsoft.com/en-us/collaboration/awards/nff.aspx>

Design Expo - interdisciplinary student teams

- Tuesday, July 14
- Kodiak
- 1:00 – 3:45

- Top undergraduate & graduate design institutions showcase their projects on the topic “New Ways of Working”

- Carnegie Mellon, Department of Design
- Central Academy of Fine Arts, Media Lab, Beijing, China
- Art Center College of Design, Pasadena, California
- Universidad Iberoamericana, México City
- Dundee University, Scotland, UK
- New York University, Interactive Telecommunications Program
- University of Washington, Interaction Design Division

Information Dynamics

Content Changes

User Visitation/ReVisitation

Today's Browse and Search Experiences

But, ignores ...

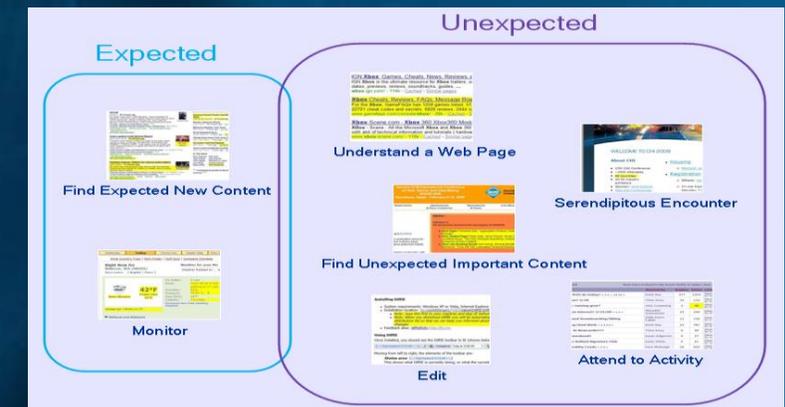

What We Are Doing

- Analyzing:
 - Content change patterns
 - User re-visitation patterns
 - Relations between change and re-visitation
- Developing:
 - Retrieval models that incorporate time
 - **Diff-IE** browser plug-in
 - Highlights what's new since you last visited
 - Changes how people view change

demo

Recap

- Web information is highly dynamic
 - Yet, most tools work with a single snapshot of the information
- Understand content change, user re-visitation patterns, and their relationship
- Develop support in
 - ◆ Browsers (e.g., DiffIE viewing change, notification, presentation)
 - ◆ Search engines (e.g., crawl policy, indexing and ranking algorithms)
- More information
 - ◆ Demo #24
 - ◆ <http://research.microsoft.com/~sdumais>

Ease of Sharing & Socializing on the web...

Microsoft
Research

The screenshot shows a YouTube video player for 'MS Office Labs 2019'. The video is titled 'MS Office Labs 2019' and has 110,353 views and 138 ratings. The video player shows a scene with two people in a classroom setting. Below the video player, there are several sections: 'More From: picturepan2' with a 'Subscribe' button, 'Related Videos' including 'Microsoft Office Labs Vision 2019 Montage: Full...', 'Microsoft Office Labs Vision 2019 Montage: Retail', 'Wow Look at These Future Cars', and 'Office Labs: Future of personal health concept'. There are also 'Text Comments (108)' and a 'Share' button.

The screenshot shows a Scribd document titled 'Facebook Market Analysis'. The document is a slide presentation with a dark green background and white text. The main text on the slide reads: 'Your Message Media & Direct Intelligence's guide to Facebook and Non-Profits'. The Scribd interface includes a search bar, navigation buttons, and a 'Publish Your Documents' section.

The screenshot shows a Slideshare presentation titled 'Silverlight 3 Briefing Deck'. The presentation is a slide deck with a blue and white theme. The main slide features the text 'MIX 2009 Silverlight 3 Briefing'. The Slideshare interface includes a search bar, navigation buttons, and a 'Use WebEx to share your ideas' section.

- URLs
- Rich previews
- Social context (comments, ratings, etc.)
- Public sharing

Social Desktop

Microsoft
Research

The screenshot displays the Social Desktop application interface. On the left, a sidebar shows navigation options: Favorites (Desktop, Downloads, Recent Places, My Site), Libraries, Computer (OS (C:)), and Network. The main area is titled "Documents library" and contains a grid of document thumbnails. The selected document, "Kodu - programming for xbox 360", is shown in a viewer on the right. The viewer displays a presentation slide with the "KODU GAME LAB" logo and a comment section. The comment section includes an "Add Comment" button and two comments: "tomim commented 7/10/2009 4:04 AM My kids love thi" and "filich commented 7/9/2009 4:14 AM Updated Kodu - programming for xbox 360.pptx: Kodu Game Lab - visual programming for kids on the xbox 360. Best contact is MattMac". The bottom status bar provides details for the selected document: "Kodu - programming for xbox 360", "Title: Why programming for ...", "Size: 3.07 MB", "Tags: Add a tag", "Content status: Add text", "Slides: 6", "Authors: Matthew MacLaurin", "Date modified: 7/9/2009 11:14 AM", and "Categories: Add a category". The system tray at the bottom right shows the time as 3:16 PM on 7/13/2009.

demo

Summary

- Make sharing easy
- Unify the desktop & web
- Apply the ideas to work as well as home

- Next steps
 - Deploy to see how it's used in different settings
