Cliff Maas on the Yarnell Hill Fire

Hours before the incident it was clear there was a real threat...satellite and radar showed developing convection to the north that was moving south towards the fire.

High-resolution numerical models showed a threat. Were there any meteorologists working the fire? If not, why not? This terrible tragedy needs to be reviewed carefully.

A number of media outlets called the strong winds unpredictable and random. This is not correct, as shown by the information I provided above.

Greek forest fires kill 56 as blaze nears Athens

Image 1 of 2

A hot, dry summer and a three-day heatwave with temperatures of 40C created the tinderbox conditions

By **Roya Nikkhah** and **Emma Henry**

4:00PM BST 26 Aug 2007

Massive forest fires which have killed at least 56 people in Greece are racing towards the site of the ancient Olympics.

All Scientific Data Online

- Many disciplines overlap and use data from other sciences.
- Internet can unify all literature and data
- Go from literature to computation to data back to literature.
- Information at your fingertips –
For everyone, everywhere
- Increase Scientific Information Velocity
- Huge increase in Science Productivity

(From Jim Gray's last talk)

The Future of Computing

The Future of Computing

Over **2,500** academics and scientists from **500+** universities have attended Faculty Summit (Redmond) since 2000

60 Faculty Fellowships awarded since 2005 in North America

250 researchers from **50** universities in **16** countries have joined the Latin American and Caribbean Collaborative ICT Research Federation (LACCIR)

60 students worldwide awarded Ph.D. fellowships and scholarships in 2012

465 students from more than **35** countries have interned at our Cambridge (UK) lab since 2006

50 Graduate Women's Scholarships awarded since 2008

In Asia, over **450** top students awarded Stars of Tomorrow internships every year

1,765 people attended our Techvista 2012 symposium in Kolkata

Over **200** Ph.D. student fellowships awarded since 2004 in Europe

35,000 scientists, academic researchers, faculty and students have attended our summits, conferences, workshops since 2008

Over **1,100** students selected annually for lab internships in the U.S., China, India and UK

Microsoft Research collaborates with over **100** top universities in North America

2,000 students, faculty and research scientists attended our Computing in the 21st Century conferences in Tianjin

Over **90** students and young faculty attend our India Summer School Program every year
