Topics

Context

Studies; datasets

Teams of collaborators

What we (think we) know

Findings and observations

Concerns and opportunities

Research methods [Ethics, Proliferation of studies without context data]

Design affordances for inclusion

Context: Occupy

Twitter dataset
300 million tweets
64 million processed, sampled

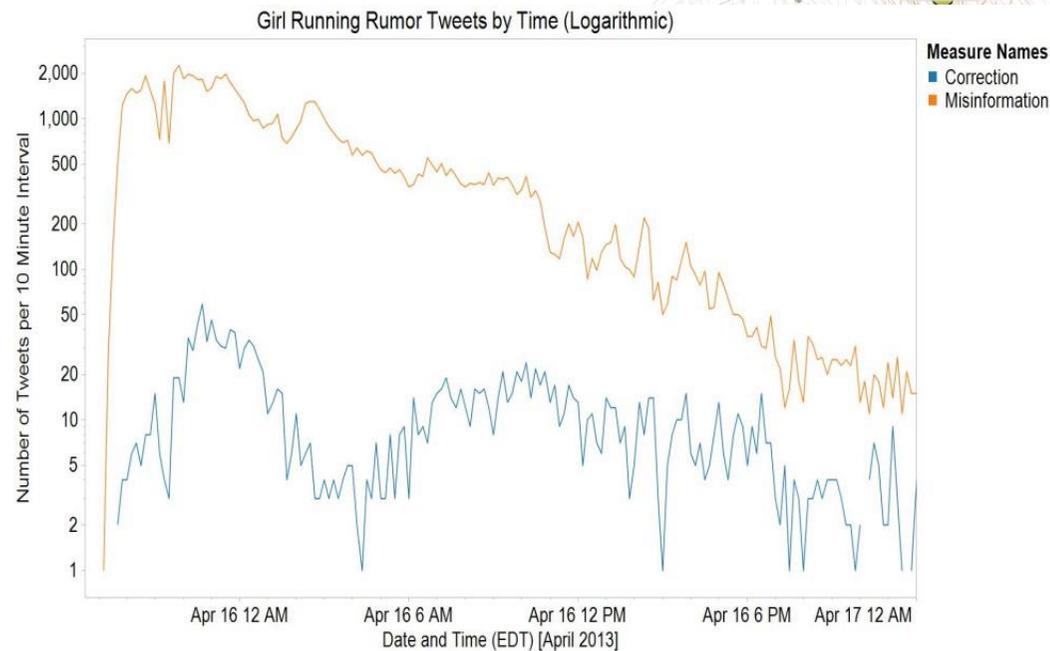

Context: Boston Marathon Bombing

Twitter datasets

10.6 million contemporaneous

25.6 million processed, sampled

What we (think we) know

Roles of social media

Internal: sense of community

External: outward facing; attention of traditional media

Practical: rapid communication and mobilization; logistics management

Place matters

Place ~ identity, not just geographic coordinates

Influence

Virality and memes persist and become part of the language

Movements contribute to the social discourse

Dysfunctional behavior and social inequities replicated through social media

Concerns; Opportunities

Research

Conceptual: metaphors; measures of participation and engagement

Ethics of research in this space

Misleading reports? Easy to collect/analyze data, but context missing

Signatures of events and types of rumors

Design

Affordances that encourage participation

Systems that reduce/eliminate dysfunctional behavior

ACKNOWLEDGEMENTS

NSF Awards 1243170, 1342252

INSPIRE: Tools, Models, and Innovation Platforms for Research on Social Media

RAPID: Social Media: Learning from the Boston Marathon Bombing
